

# Tell them to step on it!

## It's time to greenlight a transportation package!

Traffic congestion...damaged roads and bridges...lack of transit options... inaction on Washington's troubled transportation system has left us with unsafe roads and hurt our economy.

Finally, there are smart, comprehensive and statewide transportation solutions in the State House and State Senate ready to get Washington moving again. They will repair and maintain roads, ease traffic jams, improve safety and freight mobility, finish projects like the 520 bridge, and expand transit options like light rail — and include reforms to ensure that tax dollars are spent effectively and accountably.

But we're running out of time. Call your legislators: Urge them to pass a bipartisan transportation package now.

**Call toll-free: 1.800.562.6000. Tell them to get it done!**
